

Plustek OpticFilm 8100

Speed and ease of use for quality negatives and slides scanning

The **Plustek OpticFilm 8100** is a dedicated and versatile film scanner with 7200 dpi optical resolution. Its light sources give images more precise color rendering with less power consumption. Two one-touch buttons make scanning easier and more efficient for sharing on websites such as Flickr, Facebook, Picasa, etc.

The **Plustek OpticFilm 8100** and SilverFast software make a perfect combination. SilverFast Multi-Exposure® is especially for increasing the dynamic range, which adds more shadow details and eliminates noise. SilverFast NegaFix® with over 120 profiles for negative film guarantees best results when converting negatives into brilliant positives.

The **Plustek OpticFilm 8100** scanner is bundled with the newest version of LaserSoft Imaging's acclaimed scanner

software - SilverFast 8. The new WorkflowPilot® guides users through all scanning and processing steps. A new graphical user interface reduces the learning curve, and the preview mode allows users to immediately see the results of any adjustments made, even the results of complex functions. SilverFast 8 supports Multi-Tasking and the latest 64-bit hardware and is extremely fast and efficient. (For more information, please visit www.silverfast.com)

With the **Plustek OpticFilm 8100** it is easier than ever to get started. It is the ideal film scanner for a wide range of users, including home users, lomographers, small office / workshop users, amateur photographers and photographers.
